

Lab-1: Git and Github

Introduction to Software Systems | Monsoon 2021

TASK

1. Fork repo [\[here\]](#)
2. clone the forked repo to your local machine
3. make some changes to Readme
4. push these changes to your Github forked repo
5. **Merge Conflict:**
 - Make some changes to the Github Repository using the Github GUI.
 - Make some changes to the local repository. Now push these local changes to Github, you will see an error.
 - Pull the Changes made to Github, you will see a merge conflict. Resolve the conflict and push the local changes to Github.
6. Send the pull request (*Needs to be done by your own*)
